PROFILE

About 6 years in commercial development and QA. Alongside my day job, I take my own products from the first prototype to launch - including APIs, payments and LLM integrations.

Commercial focus: PHP, JavaScript, SQL and business-system integration. Target roles: Integration Engineer, Technical Implementation Engineer, Full-Stack Product Engineer and AI Solutions Engineer.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer · Gazprom Inform LLC

Aug 2023 - Present

- Optimised API operations and SQL queries, improving service response times by approximately 30%.
- Built a meeting-room booking service from scratch, replacing a manual process and saving approximately 17.5 employee-hours per week.
- Integrated applications with a corporate SOAP data bus: parsed, validated and transformed large, flat datasets into hierarchical models.
- Develop Python scripts with Pandas and NumPy to analyse logs, metrics and operational data; investigate production issues and improve existing services.

Full-Stack Web Developer · Onpeak Digital

Mar 2021 - Sep 2022

- Measured page-loading performance with Chrome DevTools, Lighthouse and PageSpeed Insights. Used the findings to refactor legacy code, implement Bitrix Composite Site, optimise APIs and JavaScript, and improve caching and lazy loading.
- Introduced Docker and Docker Compose to make development environments and deployments more reproducible.
- Mentored two junior developers, reviewed code, broke down requirements and assigned tasks within Scrum and Kanban workflows.
- Developed PHP, JavaScript and MySQL e-commerce solutions; investigated bottlenecks and production defects across backend, frontend and database layers.

QA & Web Developer · ITooLabs

Sep 2018 - Mar 2020

Part-time | IP telephony and cloud communications

- Developed backend functionality in native PHP and SQL, including a visitor feedback widget with its own data storage.
- Integrated CRM and IP telephony APIs to automate call processing and customer data workflows.
- Configured and used Zabbix to monitor service availability; combined issue investigation with QA and defect reporting.

Selected projects & education

Demiurge Assistant

A knowledge workspace for fictional worlds. AI suggests characters, facts and relationships; the author reviews what becomes part of the world.

- Built draft generation, entity editing and relationship creation with human review before changes are applied.
- An ongoing personal experiment, tested by me and one other person - not yet validated for a wider audience.

React · FastAPI · SQLite · Local LLM · RAG · Human-in-the-loop

AstroCode

A subscription app launched on web, Telegram and Android. I built the product, connected payments and account access, and received the first paid subscription.

- Publicly launched across web, Telegram and Android.
- 804 store page views, 11 installs and 1 paid monthly subscription from 01 June 2026 to 13 July 2026.
- These early results were recorded without an active advertising campaign.

React · TypeScript · Node.js · YooKassa · Telegram · Android

<https://astrocode-app.ru/>

Archive Assistant Bot

A Telegram bot that answers questions about a private document archive. It searches locally, generates an answer and links back to the source material.

- Built and tested the complete local RAG workflow for Russian-language documentation.

Python · FAISS · Qwen · LM Studio · Telegram · RAG

<https://github.com/theDAREK497/archive-assistant-bot>

TECHNICAL SKILLS

Backend & APIs: PHP · Python · FastAPI · Node.js · Express · REST APIs · SOAP

Frontend: JavaScript · TypeScript · React · HTML · CSS · 1C-Bitrix · WordPress

Integrations & Automation: Webhooks · JWT · YooKassa · Telegram · External services · Requirements analysis

AI Applications: OpenAI-compatible APIs · Local LLMs · RAG fundamentals · Structured LLM outputs · Human-in-the-loop

Data & Storage: SQL · PostgreSQL · MySQL · SQLite · FAISS · Pandas · NumPy

Delivery & Quality: Git · Docker · Docker Compose · GitLab CI/CD · Zabbix · Debugging · Manual testing

EDUCATION

Master's Degree in Computer Science and Engineering

Tula State University · 2020 - 2022

Specialization: Computer Analysis and Data Interpretation · 09.04.01

Bachelor's Degree in Information Systems and Technologies

Tula State University · 2016 - 2020

Program 09.03.02
