

Ilya Gurikov

Full-Stack & AI Integration Engineer

ilion9871@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Russia | Open to remote or hybrid roles | English B1 | Russian native

PROFILE

About 6 years in commercial development and QA. Alongside my day job, I take my own products from the first prototype to launch - including APIs, payments and LLM integrations.

TECHNICAL SKILLS

Backend & APIs: PHP · Python · FastAPI · Node.js · Express · REST APIs · SOAP

Frontend: JavaScript · TypeScript · React · HTML · CSS · 1C-Bitrix · WordPress

Integrations & Automation: Webhooks · JWT · YooKassa · Telegram · External services · Requirements analysis

AI Applications: OpenAI-compatible APIs · Local LLMs · RAG fundamentals · Structured LLM outputs · Human-in-the-loop

Data & Storage: SQL · PostgreSQL · MySQL · SQLite · FAISS

Delivery & Quality: Git · Docker · GitLab CI/CD · Debugging · Manual testing

PROFESSIONAL EXPERIENCE

Full-Stack Developer · Gazprom Inform LLC

Aug 2023 - Present

- Built a Python and FastAPI service for analysing logs and operational metrics, helping the team identify incidents earlier.
- Improved API and database behaviour through query refactoring, indexing and caching.
- Integrated internal services through SOAP APIs and an enterprise service bus.

Full-Stack Developer · OnPeak

Mar 2021 - Sep 2022

- Containerised services and contributed to automated delivery through GitLab CI/CD.
- Developed an adapter for synchronising orders with an external inventory system, including retry and failure-handling logic.
- Refactored legacy application code and improved maintainability and page performance.

Manual QA & Frontend Developer · ITooLabs

Sep 2018 - Mar 2020

- Tested product flows and documented defects across web interfaces.
- Implemented frontend changes and supported issue investigation with the development team.

Selected projects & education

Demiurge Assistant

Active development · Product Designer · Software Architect · Full-Stack Engineer

A knowledge workspace for fictional worlds. AI suggests characters, facts and relationships; the author reviews what becomes part of the world.

- Built draft generation, entity editing and relationship creation with human review before changes are applied.
- An ongoing personal experiment, tested by me and one other person - not yet validated for a wider audience.

React · FastAPI · SQLite · Local LLM · RAG · Human-in-the-loop

<https://github.com/theDAREK497/demiurge-assistant>

AstroCode

Live · Independent Product Engineer

A subscription app launched on web, Telegram and Android. I built the product, connected payments and account access, and received the first paid subscription.

- Publicly launched across web, Telegram and Android.
- 804 store page views, 11 installs and 1 paid monthly subscription from 01 June 2026 to 13 July 2026.
- The measured period had no active advertising campaign. No installation conversion is claimed.

React · TypeScript · Node.js · YooKassa · Telegram · Android

<https://astrocode-app.ru/>

Archive Assistant Bot

Prototype · RAG Prototype · Telegram Interface

A Telegram bot that answers questions about a private document archive. It searches locally, generates an answer and links back to the source material.

- Built and tested the complete local RAG workflow for Russian-language documentation.

Python · FAISS · Qwen · LM Studio · Telegram · RAG

<https://github.com/theDAREK497/archive-assistant-bot>

EDUCATION

Master's Degree in Computer Science and Engineering

Tula State University · 2020 - 2022

Specialization: Computer Analysis and Data Interpretation · 09.04.01

Bachelor's Degree in Information Systems and Technologies

Tula State University · 2016 - 2020

Program 09.03.02
